Education

New Jersey Institute of Technology

September 2019 – May 2023

- BS in Computer Science
- GPA: 3.856
- Dean's List: Fall 2019 – Current

Skills

Programming Languages

JavaScript/TypeScript, HTML/CSS, Java

Tools & Frameworks

React.js, Git, MongoDB, Express, Node.js

Design

Photoshop, Adobe XD

Experience

Software Engineer Intern @ Moody's Analytics // June 2021 – July 2021

- Developed UI front-end components using **React** and **TypeScript** for an upcoming product
- Created and managed **AWS Lambda** functions to customize payload from API
- Wrote generator functions, app selectors, and sagas with **Redux Saga** to consume data from API
- Maintained code by writing documentation and leading meetings on good SCSS practices
- Facilitated unit tests with **Jest** and **React Testing library** to prevent unexpected functionality

Volunteer Software Engineer @ Catena Bible // September 2020 – Current

- Rebuilt catenabible.com to improve stability/design resulting in 33% growth to 4.6k monthly users
- Implemented complete front-end redesign, later employed on church websites
- Integrated server-side rendering and static pages with **React** and **Next.js**

Programming Instructor @ iD Tech Camp // May 2020 – August 2020

- Organized and led 2-hour daily online sessions with over 100 students aged 7-15 using Zoom
- Taught programming fundamentals with languages including **Java**, **JavaScript**, **C#**, and **C++**

Projects

MathPro – [Website](#), [GitHub](#)

Create Procedurally Generated Math Worksheets // January 2021 – Current

- Led front-end design of application, wireframed, and prototyped on Adobe XD
- Developed website using **React** and deployed onto **Firebase**
- Onboarded new members, broke down initiatives into tasks, and monitored progress on Asana
- Adopted tech stack and established coding standards for the team during weekly meetings

Gulp App – [Website](#), [GitHub](#)

Find the Worst Reviewed Restaurants // September 2020

- Designed and built web application using **React** and **CSS**
- Fetched data using **JavaScript** and axios from the Yelp Fusion API

Contact Keeper – [Website](#), [GitHub](#)

Full-Stack Contact Application // August 2020

- Utilized **Node.js** and **Express** to perform CRUD operations on a **MongoDB** cloud database
- Created log-in and private routes using bcrypt and JSON Web Tokens
